

IB-530

Reinforced Hypalon construction with rub strakes

Available with or without speed tubes

Aluminum deck with D-rings

2" transom with chafe plate

Large scuppers with elephant trunks to inhibit water entry

Ample lifelines and lifting handles

Interior drain access

Made of reinforced Hypalon material at a competitive price, Wing Inflatable's IB-530 is designed to keep you and a dozen of your closest friends out of harm's way. With a maximum payload of 4,532 lbs., it can carry tons of personnel and gear. With its beefy 2" specially reinforced transom, the IB-530 can be powered by a single outboard or twins.
