

Quickly installs on many PWC hulls

Polyurethane collar affords superior stability, shock absorption and flotation

Additional hull surface area means quicker hole-shots and greater load carrying capacity

Space to stow equipment

Aluminum hull provides PWC hull impact protection

Introducing yet another innovative solution from Wing – the RIBSKI™, an aluminum hull and polyurethane collar for your PWC. Combine the exhilarating performance, shallow water capabilities, and comparatively low cost of a PWC, add a RIBSKI for impact protection, superior lateral stability and flotation, and you have the perfect platform to make an impossible job – possible.

SPECIFICATIONS		
LOA:	13'2"	4.01 m
Beam:	6'3"	1.91 m
Draft (w/260 lb. person):	4" plane, 9" idle	.10 m/.23 m
Weight:	283 lbs.	128.37 kg
Persons Capacity:	See PWC	See PWC

# RIBSKI™

## KEY FEATURES AND BENEFITS

---

- Combine RIB functionality with exhilarating PWC maneuverability for big jobs in small spaces
- Aluminum hull provides PWC hull impact protection
- Durable collar lends superior stability, drier ride
- Air collar features 40 ounce polyurethane for superior puncture resistance, providing flotation and shock absorption
- Greater hull surface area allows higher load capacity and quicker hole-shots
- Hull bottom: 3/16" 5083 aluminum alloy, sides 1/8"
- Wider beam means space for gear
- Lower cost than a comparable RIB
- Fits many PWC hulls (Yamaha FX, SeaDoo RXP, etc.)
- Easy to install and remove

## STANDARD FEATURES

---

- Aluminum hull
- Aluminum bow rail
- Aluminum stern crash rail
- Bow eye
- Choice of collar color
- D-Rings in standard configuration
- Heavy duty rub strake
- Installation/removal fittings & straps
- Lifelines
- Polyurethane air collar (40 oz.)
- Wing-thane coating (provides UV protection and skid resistance)
- Wing warranty
